

Insula's Risks

As a young start up operating in the cryptocurrency sphere (which remains partly unregulated), Insula carries significant risks.

These risks are listed/specified in our **Terms and Conditions**, which are adapted from the FCA's website guidance on unregulated utility & exchange tokens' nomenclature & risks - including the boundaries of the current regulatory perimeter.

These risks were studied prior to launching the Insula venture and it is assumed that stakeholders taking part in Insula are aware of these risks.

Insula is designed for **advanced/sophisticated crypto investors** as stated on our landing page. Such investor profiles are by nature aware of the underlying risks.

Prior to invest, please read & acknowledge the entirety of Insula's documentation, **terms and conditions, disclaimers** and **business compliance policy**.

We kindly invite you to read our **terms and conditions** and **business compliance** procedure and to acknowledge the risks associated with using Insula and investing crypto with Insula.
