

Insulians have numerous choices with regards to their Insula Tokens:

1. Provide liquidity to the ISLA Uniswap market and receive interests.
2. Sell ISLA against high, and buy low against 100+ other cryptocurrencies.
3. Sell their ISLA against ETH and invest it into Insula Decentralized Funds.
4. Hold ISLA as a long term, volatile investment.

1.Extended version: Provide liquidity to the ISLA Uniswap market and receive interests.

To begin your experience as a liquidity provider and to begin earning liquidity provider interests, we suggest the creation of a Uniswap ROI account.

This will allow you to monitor conveniently your investment in Insula Liquidity Pool on Uniswap.

All you need is the Ethereum address you have used for the Insula Token interaction with Uniswap Decentralised Exchange.

Uniswap ROI example:
